Subject: RE: ERT-Ludlum 2241 3*3

The part number is 44-20 for the probe only.

All,

What is the part number for the 3x3?

Thanks.

Mike

My suggestion is to rent at this point unless Special Teams comes up with definite solution and known shipping date. We use the 3x3 constantly on the three sites and we will be working all that week.

Regards,

Eric

I'll reach out to RERT, as well. VIPER is an EPA/ERT product. In the rad world, we are trying to move away from VIPER to the new RSX system. I believe RERT has a new buggy setup with their RSX system. If Dave can't come out, I could always see if RERT is available. Also, I could always leave Eric's site for a week, if Dave will let me operate his system. Also, Eric, I don't know if we would be using our 3x3 for that week unless we start removal of area 7? Maybe Dan could use it for the week? Just some thoughts. I'll reach out but folks are probably away from their desks this week.

Ben and Mike,
I cannot get a Ludlum 2241 3x3 from ERT. We need to look into other suppliers. I don't know of any. Do either of you?

Also, if we rent one will it be VIPER compatible?

Dan

Eric,

He should plan on getting one from another source. We gave some issues with the other 3x3s that are VIPER compatible. I still have several 2241-3s with 2x2 NaI detectors, but they are not VIPER compatible. I would recommend the RSI 4"x4"x16" system mounted on the UTV If Dan needs help with mapping. This system works much better than the VIPER systems in my opinion.

Hi Dave.

How are you? Will Dan be able to get an ERT-Ludlum 2241 3*3? He just needs to plan accordingly. Thanks. Happy Thanksgiving to all!!

Regards,

Eric

Hi Dave:

I know we spoke about this before but can Region 02 borrow one of your Ludlum 2241 3*3 units. From last you and I spoke, the two units are back from Region 09. Dan Gaughan is in need of a 3*3 unit for his Canadian Radium Site in Mount Kisco by December 7th.

Please let us know.

Thanks
